## Mission Statement

We procure and supply lubricants, pipeline, tools, fasteners and work wear, to the industrial and domestic market by providing a trusted service.

Our proactive and flexible approach enables us to deliver an exceptional experience to our trade partners.

## Lamberts Workwear

Lamberts not only supplies our customers with pipes and fittings, we can also offer a range of clothing and services to promote your business through our workwear department. In our refurbished workwear area, you can view our popular range off PPE and footwear or order more specific items to your personal requirements. In conjunction with this, we can help identify you and your business by using our in-house PRINTING and EMBROIDERY service.

By adding a logo to your garments, your customers can clearly recognise you and the service you provide on a more professional level. In our new spacious and bright department, you can relax and talk to our friendly staff about your requirements and the best options for your design.

With no minimum order quantity and quick lead times, its logical to get logo'd at Lamberts.
