Embroidery and Heat Seal Department

At Arden Winch we operate our own embroidery and heat seal department staffed by six highly-skilled employees. Our machines have a total of 30 heads and produce in excess of 500 logos per day.

We have recently completed a major extension to the department, that has further increased our capacity and productivity.

To order your own personalised clothing, all you need to do is supply us with a sample of your logo, preferably sent as vectored artwork or a high resolution picture file. Then we will digitise it and provide you with a sample for your approval.

We charge just £12 for the digitising of a logo. Once a logo has been digitised, it can be used on all your future embroidered clothing.
